DISEASE-RELATED MALNUTRITION

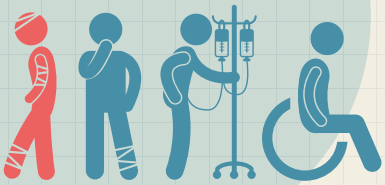

Major Public Health Concern, Simple Solution

33 MILLION PEOPLE are at risk of malnutrition in Europe

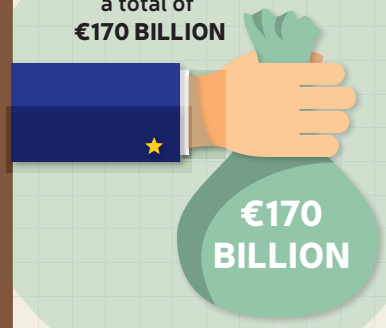

Almost **TWICE THE SIZE** of the population of The Netherlands

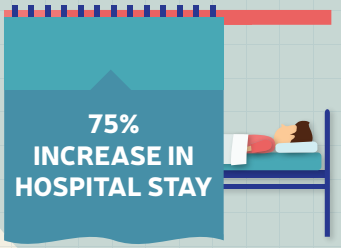

1 IN 4 PATIENTS admitted to hospital are malnourished

This costs European countries a total of **€170 BILLION**

Malnutrition increases **LENGTH OF HOSPITAL STAY**

Oral Nutritional Supplements (ONS) can help address malnutrition in patients and **SAVE VALUABLE HOSPITAL RESOURCES**

versus standard care **ONS** can **REDUCE THE COST OF OVERALL HOSPITAL CARE BY 12%**

versus standard care **ONS** can lead to **IMPROVED QUALITY OF LIFE FOR PATIENTS**

THE ANSWER IS SIMPLE:

Medical nutrition provides better care in the management of disease-related malnutrition, saving lives and cutting costs
